Copy No. 30

25X1A
[redacted] Supplement 1
Date of Information: 11 March 1959

IRAQ

Basra (ref. item 21)

Additional information as of 11 March reports 70 tanks in the port area. Of these, approximately half were in an open area adjoining the warehouses, and half were along a near-by road. Numerous shipping crates and units of RR rolling stock were in the port area; port activity considered normal.

Erbil (ref. item 22)

Later information concerning the ammunition storage area near here indicates that it was not destroyed, as earlier reported, but is a semi-buried-type storage installation typical of the region. It is said to be very active.
